

Portfolio Plan

This is the plan for the portfolio website of Zamar Wint, a IT professional and software developer from Kingston, Jamaica.

Tech Stack

- Next.js
- TypeScript
- Node.js
- Tailwind CSS
- Shadcn UI
- Framer Motion

Navigation Plan

The navigation section will include:

(Anchor links on landing page)

- About
- Background
- Work
- Recognition
- Contact

(Pages)

- Home
- Photos of Work
- Progress Report Videos

- Documents of Projects
- Chat

Home page Plan

This is the landing page of the portfolio. It is the first and most important page every visitor will see. The purpose of this page is to provide a platform for visitors to learn about me and my work.

The home page will include the following sections:

- Hero Section
- About Section
- Background Section
- Work Section
- Recognition Section
- Quote Section
- Contact Section

Hero Section

This is the first section visitors will see when they land on the home page. It is a full-width section that will take up the entire viewport. It will include a welcome message, a brief introduction, a picture of myself, and a call to action to explore my work.

About Section

This section will provide a brief overview of who I am, my background, and my interests. It will include a short biography, and a list of my skills and expertise.

Background Section

This section will provide a more detailed overview of my background and

experiences. It will include a timeline of my education and work history, as well as a list of my accomplishments and achievements.

Work Section

This section will showcase my work and projects. It will include a list of my projects, a brief description of each project, and a link to view the project in more detail.

Recognition Section

This section will showcase my awards and recognition. It will include a list and a brief description of each award and recognition.

Quote Section

This section will showcase a meaningful quote to me. The quote is "Hard work and passion will make anyone succeed."

Contact Section

This section will provide a way for visitors to contact me. It will include my contact details and other important links.

Footer Section

This section will include links to all my social media profiles, a "Back to top" button and a "Designed and developed by Zamar Wint" text.

Gallery pages Plan

The gallery pages will include the following:

- Photos of Work
- Progress Report Videos
- Documents of Projects

Photos Page Plan

The aim of the photos page is to showcase screenshots and pictures of my projects, achievements, and other notable occasions.

Videos Page Plan

The purpose of the videos page is to showcase progress reports of my various projects. These videos will showcase my coding journey, the progress I have made on my projects, and the lessons I have learned along the way. I will also include some personal videos of myself and my experiences.

Documents Page Plan

The purpose of the documents page is to showcase the relevant documentation of my various projects. These will include my project plans, design systems, and other relevant information. These documents will help visitors to understand the inner workings of my projects and the thought process behind them.

Chat Page Plan

The purpose of the chat page is to provide a platform for visitors to chat with my chatbot agent, Zamar's Assistant. It will be a place where visitors can ask questions, share their thoughts, and engage in meaningful conversations.

Keyboard Shortcuts Plan

There is only one keyboard shortcut in this portfolio project. It will be used to toggle between light and dark mode.

- `Alt + T` - Toggle between light and dark mode.
